UX/UI Capstone Project – Umma Baby

Mar 2022 - present

Visual Design

User-centered Design

Figma

User Interface Prototyping

User Flows

- Designed an end-to-end mobile experience that centered around using mobile devices to connect new mothers with other new mothers in their immediate proximity.
- Carried out the entire design process which included researching, data synthesis, UI design, testing, and iterations, while focusing heavily on human-centered design.
- Synthesized data into user flow diagrams, user stories, wireframes, and high-fidelity mockup screens.
